Patent No. 639973

GENERAL INFORMATION:

GENERAL INFORMATION:

TITLE OF INVENTION: A NUCLEIC ACID ENCODING A RETINOBLASTOMA BINDING PROTEIN (RBP-7)

FILE REPERBNCE: GENSET. 031A

CURRENT FILLING DATE: 1999-06-30

PRIOR APPLICATION NUMBER: US 60/091,315

PRIOR APPLICATION NUMBER: US 60/111,909

PRIOR FILING DATE: 1998-12-10

NUMBER OF SEQ ID NOS: 140

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ã
                                                                                                                                                          Sequence 5, Application US/09305384

Patent No. 624218

GENURAL INFORMATION:
APPLICANT: Treco, Douglas A.
APPLICANT: Beartlein, Michael W.
APPLICANT: Beartlein, Michael W.
APPLICANT: Beartlein, Michael W.
APPLICANT: Beartlein, Michael W.
APPLICANT: Selden, Richard F.
TITLE OF INVENTION: GENOMIC SEQUENCES FOR PROTEIN PRODUCTION AND DELIVERY
FILE REFERENCE: 07236/01701
CURRENT APPLICATION NUMBER: US 60/084,649
EARLIER APPLICATION NUMBER: US 60/084,649
BARLIER FILING DATE: 1998-05-07
NUMBER OF SEQ ID NOS: 8
SOFTWARE: FastSEQ for Windows Version 3.0

LENGTH: 6235

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Gaps
                                                                                                                                                                                                                                                                                  US-08-884-324-9

Sequence 9, Application US/08884324

Sequence 9, Application US/08884324

Patent NO. 6060283

GENERAL INFORMATION:

APPLICANT: Takanori OKURA

APPLICANT: RAkulj TORIGOE

APPLICANT: Masshi WIRIMOYO

TITLE OF INVENTION: GENOMIC DNA ENCODING A POLYPEPTIDE CAPABLE

TITLE OF INVENTION: OF INDUCING THE PRODUCTION OF INTERFERON-

NUMBER OF SEQUENCES: 35

CORRESPONDENCE ADDRESS:

ADDRESSEE: BROWDY AND NEIMARK
                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö

Sequence 3872, Application US/09880107

Patent No. US20020142981a1

SERERAL INFORMATION:

APPLICANT: Horne, Darci T.

APPLICANT: Scherf, Uwe

APPLICANT: Gene Logic, Inc.

TITLE OF INVENTION: Gene Expression Profiles in Liver Cancer

FILE REFREENCE: 44921-508-W0

CURRENT APPLICATION NUMBER: US/09/880,107

CURRENT APPLICATION NUMBER: US 60/211,379

PRIOR FILING DATE: 2000-06-14

PRIOR FILING DATE: 2000-06-14

PRIOR FILING DATE: 2000-01-02

NUMBER OF SEQ ID NOS: 3950

SOFTWARE PATENTING NOW 2: 2.1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         음
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        à
                                                                                                                                                                                                                                                                                                                                            Sequence 79, Application US/09969708

Sequence 79, Application US/09969708

Patent No. US20020102532A1

GENERAL INFORMATION:
TITLE OF INVENTION: Cancer Gene Determination and Therapeutic Screening Using Signaturitle OF INVENTION: Sets

TITLE OF INVENTION: Sets

FILLE REFERENCE: 689200-70

CURRENT APPLICATION NUMBER: US/09/969,708

CURRENT FILING DATE: 2001-10-03

PRIOR APPLICATION NUMBER: US/60/237,608

PRIOR APPLICATION NUMBER: US/60/237,608

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-10-03

NUMBER OF SEQ ID NOS: 658

SOFTWARE: Patentin version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 FACELL NO. 222002111037A1

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Description
